ZUWA ENERGY REINFORCES ITS ROLE AS MALAWI'S SOLAR CHAMPION

Zuwa Energy continues to emphasize the need for Malawians to adopt clean energy solutions amid the rising cost of living and the growing effects of climate change. Understanding the financial realities of Malawian families, Zuwa Energy offers the Kwacha 6 through flexible payment plans that cater to both cash customers and those who need affordable monthly instalments.

Chief Operating Officer, Winston Ngwira, commented that The Kwacha 6 is a reliable solar system suitable for both urban and rural areas, designed to power an entire household. For a typical two-bedroom house, the system can light the whole home using its six included bulbs.

Zuwa Energy has a flexible payment plan that best suits Malawian budget, whether through upfront cash payments or instalments spread over 12 months.

As thousands of households currently rely on expensive candles or hazardous kerosene lamps for lighting inside their homes, Kwacha 6 is designed to be the best and reliable solution.

As the Solar Champions of Malawi, Zuwa Energy remains dedicated to walking with customers every step of the way, from purchase to installation to after-sales support.
